
Dr. Serafina Corsello is an internationally respected clinician and lecturer.

She is the initiator and cofounder of the Foundation for the Advancement of Innovative Medicine (FAIM).

She was one of the 25 physicians who, in 1992, participated in the formation of the Office of Alternative Medicine within the National Institute of Health

Many of her colleagues consider her to be “The Mother of Alternative Medicine”, having started her Complementary–Alternative journey back in 1972.

She became a physician in 1962 and has been practicing since then. In 1972 she began to include Alternative Modalities into her medical practice.

Dr. Corsello draws on a vast body of clinical experience derived from her lengthy and successful practice in Complementary–Alternative medicine.

For most of her lengthy career Dr. Corsello was the Administrative and Clinical Director of her two large medical centers; one on Long Island and the other in New York City. She was in charge of a team of professionals that ranged from 35 to 50 people; half of which were Clinical Practitioners, PA’s, Nurses, Medical Technicians, Biofeedback Therapists, Acupuncturists, etc. The rest were administrative staff to support their work.

Dr. Corsello has also developed her own brand of health products, nutrients, support packs, and information booklets that are available through her Manhattan Dispensary and through her E-Commerce site at:

The books brilliancy is in its ability to show the connection between seemingly unrelated health issues and their resulting cumulative effect on what mainstream medicine defines as full blown illness.
